

**In *Keeper of Genesis*, Robert Bauval and Graham Hancock present a *tour de force* of historical and scientific detective work and answer the following questions:**

- **When and where did history begin?**
- **When was the genesis of civilisation in Egypt?**
- **How and why were the Great Sphinx and the three pyramids of Giza designed to serve as parts of an immense three-dimensional model of the sky of 'First Time'?**
- **What is contained in the rectangular chamber that seismic surveys have located in the bedrock far below the paws of the Sphinx?**
- **What lies behind the mysterious doors recently discovered at the end of a previously unexplored shaft inside the Great Pyramid?**
- **And does mankind have a rendezvous with destiny – a rendezvous not in the future, but in the distant past, at a precise place and time?**

Using sophisticated computer simulations of the ancient skies to crack the millennial code that the monuments transcribe, Bauval and Hancock set out a startling new theory concerning the Pyramid Texts and other archaic Egyptian scriptures.
