

# the Dark Labyrinth

is the story  
of a group of  
English people who take a tour intended  
to provide mental peace. But their  
voyage ends in their being trapped in  
a labyrinth on the island of Crete.

For some the labyrinth means final trag-  
edy; for others there is a way out;  
and for one couple there is the beginning  
of a strange new *Lost Horizon* kind  
of life....

This is one of the earliest novels of  
a writer who has, in the words of *Life*  
magazine, produced a body of work  
which is "the most discussed and widely  
admired fiction of our time."
