

## **Step into a Nightmare World of Hellish Horror**

Crawling, clawing, slithery horror, seeping from the pen of that all-time master of heart-stopping terror and the supernatural –  
**H. P. Lovecraft**

Sample a dark universe peopled with forgotten gods and strange races. Thrill to the dank breath of an ages-old evil blowing icily from the dusk-cloaked eons of a time before history. Savour, in this collection of masterpieces of the weird and eerie, the tang of **total fear.**

Here are stories to set your skin crawling from the base of your spine to your scalp – and back again.

'Pages of devilish rituals, ghoulish monstrosities . . .  
genuinely horripilative'

**Punch**
