

‘The bestselling success of Graham Hancock’s *Fingerprints of the Gods* leaves no doubt that an enormous number of people are fascinated by the question of pre Ice Age civilisation. But for me this only underlines the question “What does it all mean?”

‘We have no way of seeing the universe as a whole and making sense of it. But if, unlike us the ancient Egyptians and their predecessors possessed some knowledge system that offered a unified view of the universe, the insights of Hancock only go halfway. The aim of this book is to go beyond the conviction that civilisation may be thousands of years older than we suppose, and try to grasp once again the nature of this ancient, forgotten knowledge.’

COLIN WILSON

---

‘Colin Wilson has done it again! Yet another *tour de force* and a wonderful study on human perception that will be much talked about for years to come.’

ROBERT G. BAUVAL

author of *The Orion Mystery*
