

**AFTER THREE THOUSAND YEARS OF
CIVILIZATION, ARE WE AT LAST READY
TO ACCEPT A NEW WAY OF LOOKING AT
THE WORLD?**

With startling insight, Michael Baigent and Richard Leigh, acclaimed authors of *The Holy Blood and the Holy Grail*, turn back the pages of our intellectual history to uncover the magic and alchemy that have always been part of our lives – a part which they believe is even more important in this modern scientific age.

The unifying thread, they reveal, is Hermeticism, a body of esoteric teaching which flourished in Alexandria two thousand years ago and was never entirely destroyed. *The Elixir and the Stone* traces this fascinating tradition – a parallel to today's holistic thought – from Egyptian times, through the Middle Ages and the Renaissance to the present.

With it at last comes a true context for those shadowy alchemists and magicians who have haunted our thoughts for centuries. With it, too, comes an 'alternative' way of looking at the world – and the possibility of a figure other than Christ who defines our civilization.

'An intellectual and very enjoyable read for anyone interested in the occult or history of human development' *Spirit*
